48 mm corner in aluminium

60 mm corner in Plastic with fibreglass reinforced

Corner

Pipe (Ø mm)	Material
48	Aluminium
60	Fibreglass reinforced

The corners are equipped with a cast iron wheel and 2 ball bearings. For service you can open the lid without dismounting the hole corner.

Horizontal drive unit

Vertical drive unit

Drive unit

The Vissing drive unit can be delivered as a vertical or horizontal model.

The Vissing drive unit is prepared for the 48 and 60mm feeding pipes. The cover is made of stainless steel and the drive unit is fulfilling the CE-Standards.

Wheel for drive unit

Drive unit					
	Dimension (HxBxL mm)	Weight (kg)	Pipe (Ø mm)	Speed (m/min)	Effect (kW)
Horizontal	430x430x830	69	48/60	27	1,1/1,5
Vertikal	870x450x430	69	48/60	27	1,1/1,5

Feeding chain		
Pipe (Ø mm)	Max. length (m)	Max. cap. (kg/hour)
48	300	800
60	300	1600

Loading hopper with motor

Open loading hopper

Transition hopper

Loading hopper					
Type	Dimension (HxBxL mm)	Weight (kg)	Pipe (Ø mm)	Auger (m/min)	Effect (kW)
With motor	430x730x470	31	48/60	65	0,36
Without motor	430x570x395	22	48/60	65	
Transition	22x20x55	12	48/60	65	

Vissing loading hopper

The Vissing Agro series is very reliable. From the silo is the feed transported with a strong auger for the feeding transport system. The system is homogeneous dosing the feed and at the same time it is possible to add further components into the system. The loading station is regulating the amount of feed so the transportsystem is not over-loaded or under-loaded.

The auger is prepared for pellets and meal.

The Vissing Agro serie is designed for the feeding pipes in the dimensions of 48 and 60 mm.

Additional to the loading hopper has Vissing Agro also a transition hopper for the connction of two feeding lines in pipe dimensions 48 and 60mm.

Vissing volume dispenser

Volumen dispenser

Volume (l)	Pipe (Ø mm)
7	48/60

Vissing volume dispenser

The Vissing volume dispenser is made of high quality plastic. The volume dispenser is shock-resistant and transparent, so the feed amount easy could be controlled and adjusted on the measurement band. This is possible with an empty or filled dispenser.

The transparent container and the outlet is designed with a big accuracy, so there is a minimum of dust.

The opening wire could be diconnected for each dispenser this is helpfull to avoid feeding if the dispenser is already upfilled.

The flap on the side is for adding compoments or to open for cleaning. The funnel could be removed easy, due to a bayonet lock which is making the cleaning faster and easier.

The dispenser has a wire holder integrated at the top.

Vissing Agro - Developer for pig producers

For more than 40 years Vissing Agro has been synonymous with a healthy, Danish company constantly developing and optimizing products for pig producers in Denmark and internationally.

Our own development department ensures that we are constantly at the forefront with the latest technologies and future requirements for the swine industry.

Vissing Agro is doing transport systems for animal feed for many years. The basic of the system is a feed chain with plastic discs.

Internationally, Denmark is regarded as a pioneer, when it comes to equipment for the swine industry - this good reputation, we at Vissing Agro aim to continue to live up to – and even improve.

And the results speak for themselves. Through our focused and tenacious efforts in recent years, we have been able to establish ourselves in interesting export markets and have among other things, formed strong relationships with the largest pork producers in world.

All proof that our product quality and logistics are excellent.

Equipment from Vissing Agro meets all requirements for animal welfare, safety and work environment.
